SKILLS

Programming Languages:

- Python
- Java
- C++

Web Development:

- HTML/CSS
- ReactJS
- Bootstrap
- JavaScript
- Typescript

DataBase Management:

- MySql
- MongoDB

Miscellaneous Skills:

Git || GitHub || DSA || Figma.

Soft Skills:

Problem Solving || Team Building || Time Mangement || Leadership || Negotiation Skills.

PROJECTS

React.js	Be-Blogger • Designed and developed a feature-rich blogging website using React and Node.js. • Implemented user authentication, dynamic content creation, and interactive features. • Utilized a responsive design for optimal user experience across devices.	Github-Be-Blogger
Python	Self-driving Car • Developed a Python-based self-driving car system using computer vision, machine learning and robotics principles. • Implemented a Convolutional Neural Network for end-to-end driving in a simulator using Tensorflow and Keras. The project involves training over 13,000 images in a unity3d simulator to steer the car successfully throughout the track.	Github
Html,css, react.js	Portfolio • Developed and designed a personal portfolio website using React, showcasing my skills, projects. • Implemented a responsive and modern design for optimal user experience. • Integrated features such as project showcases, contact forms, and interactive components.	github.com link

EDUCATION
